When the world-class vintners of California's Wine Country need balanced, perceptive tax and accounting advice, they turn to Donna J. Beels, CPA, MT, at Pisenti & Brinker LLP. Donna's years of experience with the specialized requirements of the wine industry provide her with unique insight into the business of viticulture. An expert in designing fiscal controls, operational analysis, and tax planning strategies, Donna helps ensure that her clients' businesses grow successfully despite seasonal and annual variations.

"Accurately identifying wine businesses' challenges and opportunities is critical," says Donna, who holds a Master of Taxation degree from Arizona State University. "I help my clients maximize their profits and increase their wealth by teaching them to interpret the financial details necessary to make sound business decisions. Because many wineries are family-owned operations, I show vintners how to incorporate their family's goals and objectives into a successful business strategy. I work with my clients throughout the year to help identify what is important to them. Together, we outline a path to meet these goals."

Pisenti & Brinker's knowledgeable professionals deliver a consistently superior approach to tax planning, financial reporting, and business valuations. Call Donna Beels today at (707) 664-8001, and learn how Pisenti & Brinker can tailor a well-balanced program for your wine-based business.
